

TOOL RECONDITIONING

at OSG Canada Ltd.

Reduce tool costs by regrinding & recoating used tools!

WHO CAN BENEFIT?

Any customer who wants to lower tooling costs by regrinding and recoating worn tools, for a fraction of the original tool cost.

SOLUTIONS

Complete reconditioning of used tools. We apply original geometry and coating technology to all OSG tools, as well as regrind and recoat competitor's products using the same stringent standards.

END RESULT

Significant reduction in tool costs and waste. Exceptional, reliable, local reconditioning from a global brand that you know and trust.

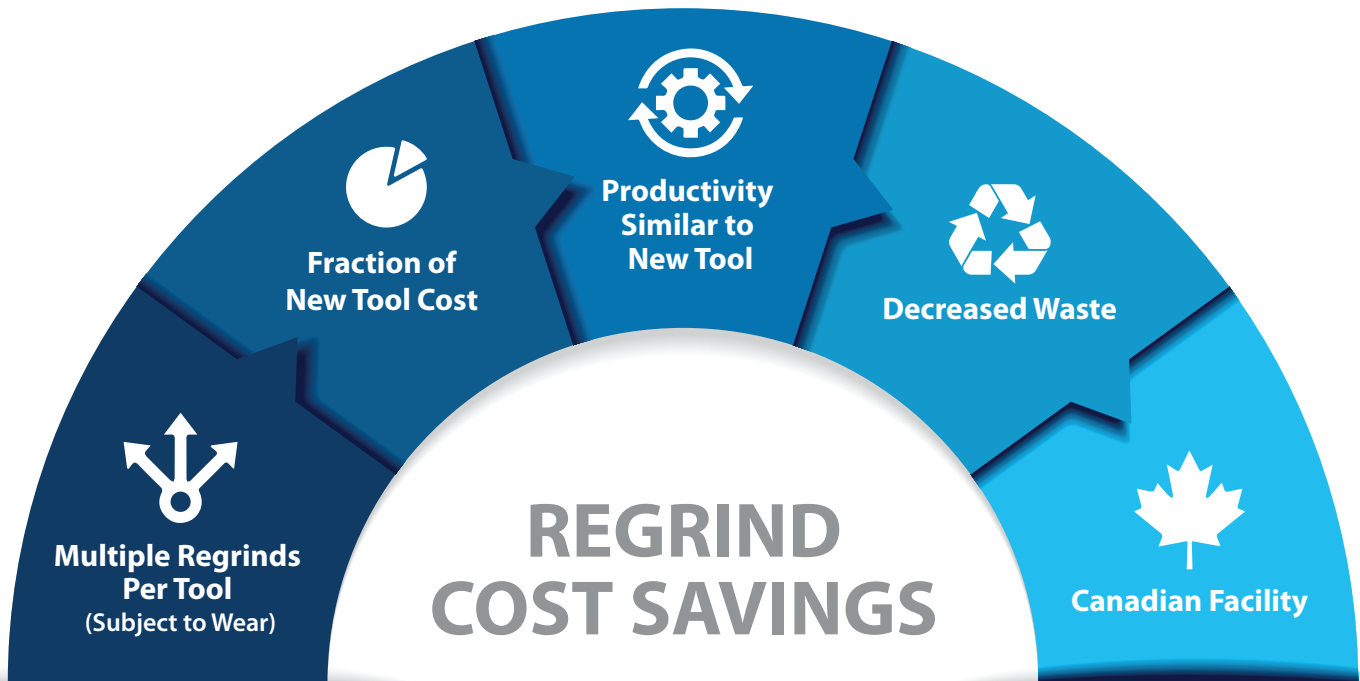

HOW DOES IT WORK

- All incoming tools are individually examined
- High-quality, consistent ground geometry and coating applied to the tool
- Multiple points of inspection throughout the reconditioning process
- Orders closely monitored to ensure on-time delivery
- Tools repackaged, labeled and returned

TOOL RECONDITIONING

at OSG Canada Ltd.

Reduce Your Tool Cost-Per-Unit

Increase tool productivity by up to 100% with each regrind- for a fraction of the new tool cost.
