CoroMill® Dura

When it comes to solid end milling, versatility and stability are key. Whether you need vibration-free machining, high performance, or a tool that adapts to multiple materials, CoroMill® Dura delivers. Now extended with super-sharp cutters for aluminum, this advanced concept features WhisperKut™ technology to eliminate harmonics and enhance stability—making roughing to finishing easier and more reliable than ever.

Efficient and versatile end milling

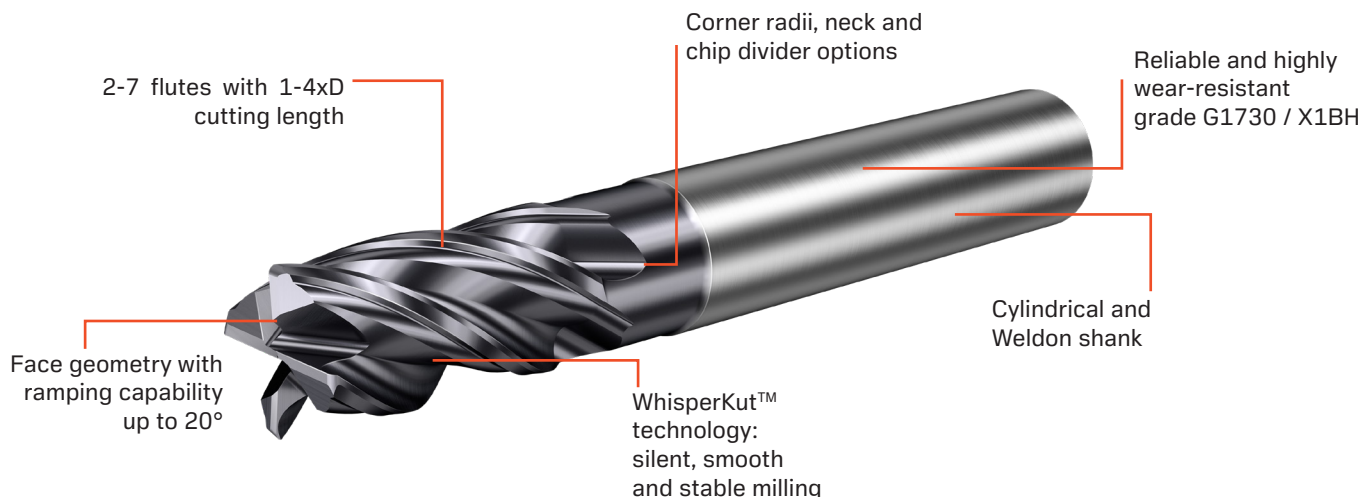

There's no reason to choose between performance and cost-efficiency — you need both. CoroMill® Dura delivers with a wide range of flute options and optimized geometries to ensure the right fit for your application.

To maximize tool life and reduce costs, CoroMill® Dura can also be reconditioned up to three times while maintaining its original performance and reliability.
