

DUALLY[®] WELD CLEANING BRUSHES

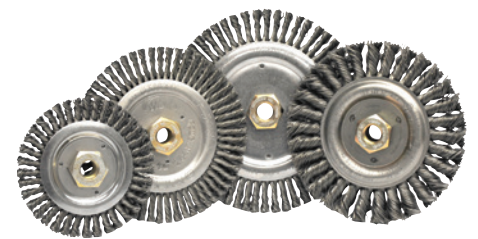

The Dually From Weiler

Featuring a unique dual-hex nut, this full line of weld cleaning brushes simplifies periodic flipping of the wheels for maximum cutting action, long life, and safer use.

These "Flip 'N Fast" Wheels offer:

- **Maximum Cleaning Action** — Featuring a knot twist with the most aggressive cutting action, the new dual-hex nut makes it easier for the user to regularly switch mounting position and keep the brush running at peak performance.
- **Long Wheel Life** — Utilizing the highest quality heat-treated steel wire and construction that virtually eliminates knot movement, the Dually delivers smooth operation and long life for the lowest cleaning costs in demanding multi-pass welding applications such as pipeline construction.
- **Improved User Safety** — The one-piece, dual-hex nut is designed to provide adequate tool clearance so there is no need to remove the guard from the grinder in order to change the position of the wheel.

FOR "FLIP 'N FAST" WHEELS, LOOK FOR THE DUALLY!

The Dually utilizes the highest quality heat-treated steel wire and construction that virtually eliminates knot movement for smooth operation, long life and the lowest weld cleaning costs.

The dual-hex nut design makes these wheels Flip 'N Fast!

DUALY® – FLIP 'N FAST WHEELS

In demanding multi-pass welding applications, a brush with the fastest, most aggressive cleaning action is worth its weight in gold!

Welder's assistants on the pipeline know the value of periodically switching the mounting position of a wheel in order to maintain speed and effectiveness. Weiler is proud to offer a line of stringer bead brushes that makes this practice safer for every user.

The Weiler Dually features a one-piece dual-hex nut which eliminates interference issues and greatly eases flipping of the wheel.

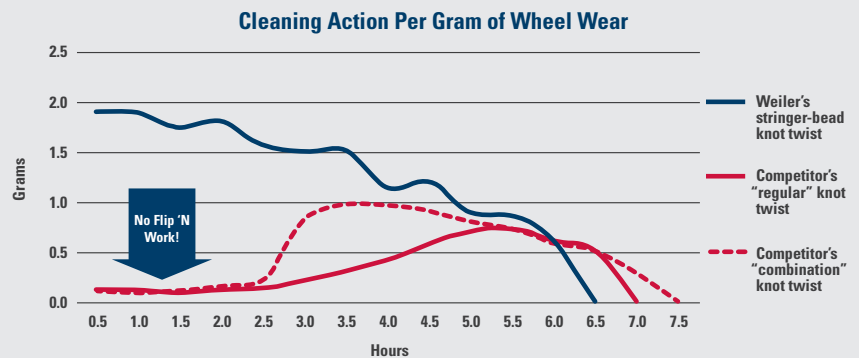

This unique one-piece nut features a hex on each side of the wheel that is high enough to insure adequate clearance in either mounting position without removing the guard from the tool. Now there's no need to compromise safety to take advantage of the "flip."

Regular "flipping" of the wheel results in self-sharpening of the wire tips for maximum performance.

The Dually features a wire twist that produces the fastest, most effective cleaning action right out of the box!

Competing knot styles feature much less effective knot twists. As the graph shows, it is only after these brushes have been used for a long enough period of time for wire breakage to occur that they go to work.

Dually® Stringer Bead Wheels

One-piece dual-hex nut design simplifies periodic flipping of the wheel for maximum cutting action, long life, and safer use. From root pass to cap pass, they excel at cleaning welds without damaging the filler material.

Dia.	Wire Size	Arbor Hole	No. of Knots	Face Width	Trim Length	Thickness at Face Plates	Max. RPM	Standard Pack	Item Number	Steel
Root Pass Brushes
